Library:	React JS
Runtime Environment:	Node.js

WORK EXPERIENCE

Intern, Frontend Developer

Indivue Technologies Private Limited | Delhi

Aug, 2022 - present

Technologies, I worked on: ReactJs and MUI

Key Duties:

- Designing components and pages and making design responsive for all devices.
- Creating reusable components like buttons, inputs, alerts etc.
- Integrating APIs in designs.

PROJECTS

Online Beat Selling Marketplace

NextJs | Tailwind CSS | MongoDB

- Develop **Online Beat selling marketplace** using **NextJs, Tailwind CSS and MongoDB**.
- And it also has some working functionalities like login, signup, reset password, change account details are created with in-build Node.js in NextJs and data is stored using MongoDB Atlas.

Deployed Link: <https://beatstore-sourabhkumhar.vercel.app/>

iNotebook, Personal Diary

ReactJs / Bootstrap | Node.Js | MongoDB

- Setup & Configure **MongoDB Atlas Managed Cluster** to store user details and their notes.
- Develop **iNotebook** using **ReactJs, Bootstrap, and Node.Js** and their features such as Context API, React Router DOM, Express.Js used to create API endpoints, etc.
- The user journey starts from the **registration process** and after login, user can save their personal notes which will be saved in MongoDB. User can access their notes anytime and update them.
